

AIR

Pollution control according to International Standards

by Dr. G. Fomin and Dr. O. Fomina

HANDBOOK

Second edition

CONTENTS

FOREWORD	14
CHAPTER 1. GENERAL CHARACTERISTIC OF AIR ENVIROMENT CONTAMINATION	16
1.1. Characteristic of air contamination in Russia.....	17
1.2. Legislation on air environment protection	19
1.3. International legislation on air environment protection.....	24
CHAPTER 2. INTERNATIONAL STANDARDIZATION OF AIR QUALITY	28
2.1. International organizations	28
2.2. Regional organizations	38
2.3. Public organizations.....	44
CHAPTER 3. NORMALIZATION OF AIR QUALITY AND EMISSION FROM SOURCES OF CONTAMINATION.....	46
3.1. Normalization of ambient air quality	48
3.2. Industrial enterprises' emission.....	48
3.3. Incinerator emission	59
3.4. Gas-engine emission	63
CHAPTER 4. QUALITY AND ECOLOGICAL MANAGEMENT.....	69
4.1. Terms and definitions	69
4.2. Quality management	69
4.3. Analytical works quality control.....	77
4.4. Ecological management	79
CHAPTER 5. ATMOSPHERE CONTAMINATION MONITORING....	84
5.1. International cooperation on air pollution control.....	85
5.2. Monitoring of acid rainfall.....	88
5.3. International program of corrosion testing ISOCORRAG.....	91
5.4. Measuring units of the atmosphere contamination and its marking.....	92
5.5. Requirements to data changing format during atmospheric monitoring	94
5.6. Atmosphere contamination monitoring in accordance with stratified sampling method	95
CHAPTER 6. CLASSIFICATION OF ATMOSPHERE.....	98
6.1. Classification of atmospheric working condition.....	98
6.2. Classification of corrosivity of atmosphere	100
6.3. Classification of corrosivity of industrial enterprise atmosphere...100	
6.4. Classification of corrosivity of internal atmosphere.....104	
6.5. Classification of corrosivity of atmosphere in clean rooms.....105	

CHAPTER 7. GENERAL REQUIREMENTS TO SAMPLING METHODS.....	108
7.1. Requirements to sampling methods	113
7.2. Meteorological condition control during sampling	114
7.3. Sampling methods for manual air pollution determination.....	115
7.4. Sampling methods for automatic air pollution determination	116
7.5. Requirements to respirable particulate matter sampling	118
CHAPTER 8. DETERMINATION OF SULPHUR COMPOUNDS.....	125
8.1. Titrimetric method for determination of sulphur dioxide in air....	126
8.2. Spectrophotometric methods for determination of sulphur dioxide in air	132
8.3. Chemical methods for determination of sulphur dioxide in exhausts gases	142
8.4. Automated methods for determination of sulphur dioxide in exhausts gases	158
8.5. Determination of sulphur dioxide deposition.....	166
CHAPTER 9. DETERMINATION OF NITROGEN COMPOUNDS...172	
9.1. Spectrophotometric method for determination of nitrogen dioxide in air	173
9.2. Chemiluminescence method for determination of nitrogen oxides in air	179
9.3. Automated methods for determination of nitrogen in exhausts gases	184
9.4. Photometric method for determination of nitrogen in exhausts gases	186
9.5. Determination of nitrogen dioxide in workplace air using detector tubes	196
9.6. Indophenol method for determination of ammonia in air.....	198
CHAPTER 10. DETERMINATION OF OZONE.....	202
10.1. Chemiluminescence method for determination of ozone in air	203
10.2. Photometric method for determination of ozone in air	205
CHAPTER 11. DETERMINATION OF CARBON OXIDES	216
11.1. Chromatographic method for determination of carbon monoxide in air	217
11.2. Method for determination of carbon monoxide in work-place air using detector tubes.....	220
11.3. Determination of exhaust carbon monoxide from automotive engines.....	222
CHAPTER 12. DETERMINATION OF AEROSOLS.....	230
12.1. Determination of black smoke index.....	231
12.2. Gravimetric method for determination of particulate matter.....	233
12.3. Determination of particulate material in gas-carrying ducts	238
CHAPTER 13. DETERMINATION OF ASBESTOS	240
13.1. Direct method for determination of asbestos fibres in air.....	240
13.2. Indirect method for determination of asbestos fibres in air.....	251

CHAPTER 14. DETERMINATION OF METALS	261
14.1. Determination of lead content using atomic absorption spectrometric method.....	262
14.2. Determination of lead content using atomic absorption spectrometric method in workplace air	264
14.3. Determination of cadmium content using atomic absorption spectrometric method in workplace air	268
14.4. Determination of arsenic content using atomic absorption spectrometric method in workplace air	284
CHAPTER 15. DETERMINATION OF ORGANIC COMPOUNDS	307
15.1. Gas chromatographic method for determination of vinyl chloride in workplace air	308
15.2. Gas chromatographic method for determination of vaporous chlorinated hydrocarbons in workplace air	311
15.3. Gas chromatographic method for determination of vaporous aromatic hydrocarbons in workplace air.....	315
15.4. Gas chromatographic method for determination of non-methane organic compounds in air	319
15.5. Gas chromatographic/mass-spectrometric method for determination of polycyclic aromatic hydrocarbons content in air.....	337
CHAPTER 16. RADIATION INSPECTION	356
CHAPTER 17. AIR QUALITY IN BUILDING.....	360
17.1. Gas chromatographic method for determination of vapor phase nicotine in air.....	365
ANNEX 1	372
List of international standards on air quality inspection	372
ANNEX 2	389
List of state and industrial standards on air quality inspection.....	389
ANNEX 3	400
List of USA standards on air quality inspection	400
BIBLIOGRAPHY	416
