

PETROLEUM

AND PETROLEUM PRODUCTS

**Encyclopedia of
International Standards**

by Dr. G. Fomin and Dr. O. Fomina

**MOSCOW
2006**

CONTENTS

FOREWORD	10
Charter 1. INTERNATIONAL AND REGIONAL STANDARDIZATION ...	13
1.1. International standardization	14
1.2. Regional standardization	26
North America	26
South America	33
Africa	34
Asia	34
West Europe	34
East Europe	39
Charter 2. ENVIRONMENT PROTECTION	43
2.1. Air	45
2.2. Water	53
2.3. Soil	55
Charter 3. MANAGEMENT SYSTEMS	58
3.1. Quality management	59
3.2. Environmental management	61
3.3. Social responsibility	63
3.4. Safety of labor	64
Charter 4. TERMS, CLASSIFICATION AND CODIFICATION	66
4.1. Terms and definitions	67
4.2. Classification of petroleum	79
4.3. Classification of petroleum products	80
4.4. Classification of lubricants	82
4.5. Classification of fuel	82
4.6. Codification of combustive-lubricating materials	85
Charter 5. REQUIREMENTS TO TEST AND LABORATORIES	88
5.1. Requirements to test	89
5.2. Accuracy of test	91
5.3. Requirements to laboratories	93
Charter 6. METHODS OF SAMPLING	95
6.1. Manual sampling	97
Sampling of homogeneous petroleum liquids	110
Sampling of non-homogeneous petroleum liquids	123
Sample handling	125
Sampling of tank deposits	131
6.2. Automatic sampling	131
Charter 7. CRUDE PETROLEUM	142
7.1. Determination of density	143
Hydrometer method	143
U-tube method	150
Pyknometer method	155
7.2. Determination of water	168
Preparation of a test portion	168

Field method	172
Distillation method for crude petroleum and petroleum products.....	179
Distillation method for crude petroleum.....	182
Potentiometric Karl Fischer titration method for crude petroleum.....	186
Potentiometric Karl Fischer titration method for petroleum products..	193
Coulometric Karl Fischer titration method for crude petroleum.....	201
Coulometric Karl Fischer titration method for petroleum products.....	204
7.3. Determination of sediment	210
Centrifuge method	210
Extraction method	215
7.4. Determination of sulfur content.....	219
Charter 8. LIQUID HYDROCARBONS.....	225
8.1. Determination of colour.....	227
8.2. Determination of hydrocarbon types.....	231
8.3. Determination of distillation characteristics	237
8.4. Determination of boiling range distribution	253
8.5. Determination of viscosity.....	264
Determination of kinematic viscosity.....	264
Determination of dynamic viscosity.....	267
8.6. Determination of cloud point.....	276
8.7. Determination of pour point	280
8.8. Determination of saponification number	286
Colour-indicator titration method.....	287
Potentiometric titration method.....	291
8.9. Determination of ash.....	297
Method for low-ash products.....	297
Method for high-ash products	300
8.10. Determination of carbon residue	304
Conradson method.....	304
Micromethod.....	310
Ramsbottom method.....	314
8.11. Determination of metal content.....	319
Determination of aluminium and silicon	319
Determination of vanadium and nickel.....	326
8.12. Determination of non-metal content	332
Determination of sulfur content by Wickbold method.....	332
Determination of sulfur content by X-ray fluorescence spectrometry....	350
Determination of sulfur content by potentiometric method.....	355
Determination of chlorine and bromine content	361
Determination of bromine number.....	366
Determination of mercaptan in hydrocarbon solvents	371
8.13. Determination of flash.....	374
Determination of flash/no flash by equilibrium method	374
Determination of flash/no flash by rapid equilibrium method.....	379
Determination of flash point by equilibrium method.....	385
Determination of flash point by rapid equilibrium method	389
Determination of flash point by Pensky-Martens method.....	395
Determination of flash point by Abel method.....	402

	Determination of flash and fire points by Cleveland method.....	408
Charter 9.	HEAVY HYDROCARBONS	414
9.1.	Determination of acid or base number	416
	Colour-indicator titration method.....	416
	Alcohol solution potentiometric titration method	421
	Semi-micro colour-indicator titration method.....	430
	Perchloric acid potentiometric titration method	435
9.2.	Determination of aniline point.....	444
9.3.	Determination of phosphorus content.....	451
9.4.	Determination of oxidation stability	456
	Method for uninhibited mineral oils	456
	Method for inhibited mineral oils	460
9.5.	Determination of foaming characteristics	470
9.6.	Determination of surface tension.....	475
9.7.	Determination of rust-prevention characteristics	477
Charter 10.	WAX	485
10.1.	Determination of congealing point.....	486
10.2.	Determination of drop melting point.....	488
10.3.	Determination of melting point	490
10.4.	Determination of oil content.....	492
Charter 11.	MOTOR FUEL	497
11.1.	Determination of vapour pressure.....	499
11.2.	Determination of octane number.....	509
	Motor method.....	509
	Research method	518
11.3.	Determination of lead content	528
11.4.	Determination of sulfur content.....	532
	Ultraviolet fluorescence method.....	532
	Energy-dispersive X-ray fluorescence spectrometry method	541
	Wavelength-dispersive X-ray fluorescence spectrometry method	549
11.5.	Determination of gum content.....	554
11.6.	Determination of oxidation stability	560
11.7.	Determination of corrosivity	564
Charter 12.	AVIATION FUEL.....	572
12.1.	Determination of the freezing point.....	575
12.2.	Determination of the smoke point	578
12.3.	Determination of the water reaction.....	582
12.4.	Determination of electrical conductivity.....	585
12.5.	Estimation of net specific energy.....	588
	Method using aniline point.....	588
	Method using hydrogen content data	591
12.6.	Determination of oxidation stability	592
12.7.	Determination vanadium content.....	603
Charter 13.	DIESEL FUEL.....	608
13.1.	Determination of cetane number.....	609
13.2.	Calculation of cetane index.....	618

13.3. Determination of particulate content	620
13.4. Determination of alkyl nitrate	626
13.5. Determination of oxidation stability	629
Charter 14. RESIDUAL FUEL OILS.....	636
14.1. Determination of total sediment	638
Centrifuge method	638
Hot filtration method	641
14.2. Determination of oxidation stability	645
Charter 15. LUBRICATING GREASES	650
15.1. Determination of cone penetration.....	651
Standard cone methods	651
Reduce cone methods	658
Low-temperature cone penetration method.....	661
15.2. Determination of dropping point	664
Observed temperature method.....	664
Wide temperature range method.....	668
15.3. Determination of water washout characteristics	671
15.4. Determination of rust-prevention characteristics	674
Charter 16. INDUSTRIAL OILS.....	680
16.1. Viscosity classification	681
16.2. Requirements for machine tools	682
16.3. Determination for cooling characteristics of industrial quenching oils.....	684
16.4. Requirements for products for temporary protection.....	690
16.5. Requirements for motorcycle oils	692
16.6. Determination for oxidation stability of gear oils	693
Charter 17. TURBINE OILS.....	701
17.1. Determination of oxidation stability	702
17.2. Determination of air separability	710
17.3. Determination of water separability.....	715
Charter 18. ELECTRICAL INSULATING OILS	719
18.1. Determination of refractive index	721
18.2. Determination of sulfur content.....	723
Charter 19. HYDRAULIC FLUIDS	726
19.1. Determination of the filterability	728
Procedure for oils in the presence of water	729
Procedure for dry oils	733
19.2. Determination of the emulsion stability	735
Method for oil emulsions in water.....	735
Method for emulsions of water in oil.....	738
19.3. Determination of the shear stability	745
19.4. Determination of anti-wear properties	750
19.5. Determination of the extreme-pressure properties.....	757
19.6. Determination of flammability properties	767
Determination of flammability on manifold.....	767
Determination of spray ignition characteristics	770

Determination of wick flame persistence	772
19.7. Determination of pH	775
19.8. Determination of oxidation stability	776
19.9. Determination of corrosivity	784
Determination of corrosivity of water-containing fluids	784
Determination of corrosivity of non-aqueous fluids.....	789
Charter 20. TRANSPORTATION AND STORAGE.....	793
20.1. Volumetric metering of viscous hydrocarbons.....	794
Turbine-type meters.....	797
Chamber-type meters.....	798
20.2. Determination of capacity of reservoirs	799
Incremental method using volumetric meters	800
Automatic methods.....	800
20.3. Determination of capacity of vertical reservoirs.....	800
Manual methods	801
Hydrostatic method	802
Automatic methods.....	803
20.4. Determination of capacity of horizontal reservoirs.....	804
20.5. Determination of temperature in reservoirs.....	804
Manual methods	804
Automatic methods.....	812
20.6. Transportation liquid hydrocarbons.....	812
Annex 1. LIST OF INTERNATIONAL STANDARDS	815
Annex 2. LIST OF AMERICAN STANDARDS.....	844
Annex 3. LIST OF EUROPEAN STANDARDS	900
Annex 4. LIST OF RUSSIAN STANDARDS	945
Annex 5. CONCORDANCE OF STANDARDS.....	971
Annex 6. FULL CLASSIFICATION OF FUELS.....	982
Annex 7. FULL CLASSIFICATION OF LUBRICANTS	985
Annex 8. REFERENCE TABLES	1008
LITERATURE	1015
SUMMARY.....	1022
CONTENTS.....	1023
INFORMATION	1028
