

PAINT AND SURFACE COATINGS

**Encyclopedia
of International Standards**

Dr. Gennady S. Fomin
Second edition

**MOSCOW
2008**

CONTENTS

FOREWORD	9
Chapter 1. PAINTS AND VARNISHES IN NATIONAL ECONOMY.....	11
Chapter 2. INTERNATIONAL AND REGIONAL STANDARDIZATION .	15
2.1. International standardization.....	16
2.2. Regional standardization	25
2.3. Management systems.....	35
2.4. Terms and definitions	42
Chapter 3. SAMPLING AND TESTS PREPARATION	51
3.1. Requirements for sampling of paints, varnishes and raw materials.....	52
3.2. Requirements for sampling of coating powders.....	57
3.3. Requirements for standard panels for testing.....	58
3.4. Temperatures and humidity's for conditioning and testing.....	67
3.5. Methods for specimens' preparation for test	68
3.6. Requirements to test	70
3.7. Requirements to laboratories	71
Chapter 4. RAW MATERIALS AND SOLVENTS	73
4.1. Determination of acid value.....	74
4.2. Determination of hydroxyl value.....	77
4.3. Determination of saponification value.....	80
4.4. Determination of softening point	83
4.5. Determination of glass transition temperature	85
4.6. Determination of turbidity.....	85
4.7. Specifications and test methods of linseed oil.....	88
4.8. Specifications and test methods of tung oil	89
4.9. Specifications and test methods of tall-oil fatty acids	90
4.10. Specifications and test methods of alkyd resins	90
4.11. Specifications and test methods of epoxy resins	92
4.12. Specifications and test methods of amino resins.....	93
4.13. Specifications and test methods of polyisocyanate resins.....	94
4.14. Specifications and test methods of chlorinated polymerization resins.....	95
4.15. Specifications and test methods of industrial cellulose nitrate solutions.....	95
4.16. Specifications and test methods of aqueous dispersions.....	96
4.17. Specifications and test methods of driers	97
Chapter 5. PIGMENTS AND EXTENDERS.....	101
5.1. General requirements for pigments tests.....	102
5.2. General requirements for extenders tests	108
5.3. General requirements for dispersion of pigments and extenders ...	118
5.4. Determination of the color.....	119
5.5. Determination of the color of white, black and colored pigments.....	121

5.6.	Determination of resistance to light of coloured pigments.....	123
5.7.	Determination of pH value of an aqueous suspension	125
5.8.	Determination of acidity or alkalinity of the aqueous extract.....	127
5.9.	Determination of resistivity of aqueous extract	128
5.10.	Determination of water-soluble matter.....	132
5.11.	Determination of water-soluble sulphates, chlorides and nitrates..	136
5.12.	Determination of density	142
5.13.	Determination of tamped volume and apparent density after tamping	148
5.14.	Determination of residue on sieve	150
5.15.	Determination of oil adsorption value	155
5.16.	Determination of mass portion of volatile matter.....	156
5.17.	Determination of heat stability.....	157
5.18.	Determination of relative tinting strength of pigments	158
5.19.	Comparison of lightening power of pigments.....	168
5.20.	Determination of resistance to bleeding of pigments.....	172
Chapter 6.	LIQUID PAINTS.....	174
6.1.	Determination of colour	175
6.2.	Determination of viscosity	181
6.3.	Determination of density	190
6.4.	Determination of fineness of grind	198
6.5.	Determination of volume of non-volatile matter.....	201
6.6.	Determination of sag resistance.....	207
6.7.	Determination of surface drying grade.....	210
6.8.	Determination of hiding power	213
6.9.	Determination of the pot-life of liquid systems	223
6.10.	Determination of non-volatile matter	225
6.11.	Determination of volatile organic compound	227
Chapter 7.	PAINT FILMS.....	236
7.1.	Determination of colour	237
7.2.	Determination of gloss.....	239
7.3.	Determination of film thickness.....	243
7.4.	Determination of adhesion	260
7.5.	Print-free test	272
7.6.	Pressure test for stackability	274
7.7.	Determination of pigment content	276
7.8.	Determination of water-vapor transmission rate.....	281
7.9.	Determination of resistance to liquids	285
7.10.	Determination of the effect of heat.....	295
Chapter 8.	MECHANICAL TESTS FOR COATINGS	297
8.1.	Bend tests	298
8.2.	Indentation tests.....	310
8.3.	Impact resistance tests	313
8.4.	Determination of wet-scrub resistance	324
8.5.	Determination of hardness.....	328
8.6.	Determination of scratch resistance	332

8.7. Determination of abrasive resistance	337
Chapter 9. COATING POWDERS.....	344
9.1. Determination of particle size	345
9.2. Determination of density	348
9.3. Determination of lower explosion limit	350
9.4. Determination of flow properties of a powder/air mixture.....	351
9.5. Determination of gel time	353
9.6. Determination of loss of mass on stoving	355
9.7. Determination of the storage stability.....	356
9.8. Determination of inclined-plane flow	358
9.9. Determination of compatibility.....	359
9.10. Determination of deposition efficiency	361
Chapter 10. METHODS OF CHEMICAL ANALYSIS.....	365
10.1. Preparation of acid extracts from paints in liquid or powder form.....	366
10.2. Determination of soluble lead content.....	376
10.3. Determination of total lead content.....	383
10.4. Determination of soluble mercury content	391
10.5. Determination of total mercury content	398
10.6. Determination of soluble chromium content.....	400
10.7. Determination of soluble cadmium content.....	406
10.8. Determination of stibium content	413
10.9. Determination of soluble barium content	420
10.10. Determination of biocides content	423
Chapter 11. CORROSIVITY OF THE ENVIRONMENT.....	426
11.1. Classification of corrosivity of the atmosphere.....	429
11.2. Methods of measurement atmospheric pollution	431
11.3. The International program on corrosion testing.....	436
11.4. Classification of the corrosivity of waters and soils	438
11.5. Classification of the corrosivity of outer space.....	439
Chapter 12. GENERAL REQUIREMENTS FOR METHODS OF CORROSION TESTING.....	441
12.1. Specimens	442
12.2. Conducting the tests.....	444
12.3. Corrosion test sites.....	446
12.4. Test chambers.....	452
12.5. Methods for the introduction of scribe marks.....	453
12.6. Methods of removing corrosion products	457
12.7. Test reporting	459
Chapter 13. TESTING IN ENVIRONMENT.....	461
13.1. Testing in atmosphere.....	462
13.2. Testing in natural aqueous media	470
13.3. Testing in soils	473
Chapter 14. ACCELERATED TESTING	475
14.1. Determination of resistance to filiform corrosion.....	480

14.2. Determination of resistance to humid atmospheres containing sulfur dioxide.....	487
14.3. Determination of resistance to neutral salt spray fog	489
14.4. Determination of resistance to humidity (continuous condensation)	494
14.5. Determination of resistance to humidity (intermittent condensation).....	501
14.6. Determination of resistance to water condensation and radiation	502
14.7. Determination of resistance to cyclic corrosion conditions	508
14.8. Determination of resistance to alternate immersion.....	517
Chapter 15. SAFETY OF MATERIALS AND COATINGS	521
15.1. Determination of flash temperature.....	522
15.2. Determination of combustion temperature.....	547
15.3. Determination of the ability to sustain combustion.....	556
15.4. Determination of formaldehyde emission.....	558
Chapter 16. BASIC DESIGN AND PREPARATION OF SUBSTRATES BEFORE APPLICATION	564
16.1. Classification of steel substrates before and after cleaning	568
16.2. Tests for the assessment of surface cleanliness.....	570
16.3. Specifications and test methods for metallic blast-cleaning abrasives	571
16.4. Specifications and test methods for non-metallic blast-cleaning abrasives.....	574
Chapter 17. PROTECTIVE PAINT SYSTEMS.....	576
17.1. Requirements for protective paint systems for offshore and related structures, exposed in sea environment.....	578
17.2. Determination of film thickness on steel structures.....	582
17.3. Determination of film adhesion on steel structures	583
Annex 1. LIST OF INTERNATIONAL STANDARDS.....	589
Annex 2. LIST OF AMERICAN STANDARDS	626
Annex 3. LIST OF EUROPEAN STANDARDS.....	668
Annex 4. LIST OF RUSSIAN STANDARDS	703
Annex 5. METHODS OF EVALUATION OF DEGRADATION OF PAINT COATINGS	715
LITERATURE	731
SUMMARY.....	737
CONTENTS.....	738
