

SOIL

Inspection of quality and ecological safety according to international standards

by Dr. G. Fomin and A. Fomin

Handbook

MOSCOW

2001

CONTENTS

FOREWORD

Chapter 1. GENERAL CHARACTERISTIC OF SOIL DEGRADATION AND POLLUTION

- 1.1. Soil resources degradation
- 1.2. Technogenic soil contamination
- 1.3. Legislation on soil environment protection

Chapter 2. INTERNATIONAL STANDARDIZATION OF SOIL QUALITY

- 2.1. International organizations
- 2.2. Regional organizations

Chapter 3. NORMALIZATION OF SOIL QUALITY

- 3.1. Normalization of chemicals' content of soil
- 3.2. Quality specification for sewage for irrigation

Chapter 4. QUALITY AND ECOLOGICAL MANAGEMENT

- 4.1. Terms and definitions
- 4.2. Quality management
- 4.3. Analytical procedures' quality control
- 4.4. Ecological management

Chapter 5. GENERAL REQUIREMENTS TO SAMPLING METHODS AND TREATMENT OF SAMPLES

- 5.1. Requirements to sampling methods
- 5.2. Pre-treatment of samples for physico-chemical analyses
- 5.3. Guidance on treatment of sludge and sediment samples

Chapter 6. CONSTITUTIVE PROPERTIES' CONTROL

- 6.1. Determination of dry bulk density
- 6.2. Determination of particle density
- 6.3. Particle-size analysis

Chapter 7. DETERMINATION OF THE WATER CONTENT AND WATER-RETENTION CHARACTERISTICS

- 7.1. Determination of water content and dry matter
- 7.2. Determination of water content as a volume fraction
- 7.3. Determination of water-retention characteristics
- 7.4. Determination of water content in the unsaturated zone

Chapter 8. INSPECTION OF PHYSICAL-CHEMICAL CHARACTERISTICS

- 8.1. Determination of pH
- 8.2. Determination of specific electrical conductivity

Chapter 9. DETERMINATION OF MINERAL COMPOSITION

- 9.1. Determination of carbonate content
- 9.2. Determination of sulphate content

Chapter 10. DETERMINATION OF CARBON

- 10.1. Determination of total carbon content
- 10.2. Determination of organic carbon content

Chapter 11. DETERMINATION OF NITROGEN

- 11.1. Determination of total nitrogen content by Kjeldahl method
- 11.2. Determination of total nitrogen content by dry combustion

Chapter 12. DETERMINATION OF PHOSPHORUS

- 12.1. Determination of soluble phosphorus

Chapter 13. DETERMINATION OF CATION EXCHANGE CAPACITY

- 13.1. Determination of effective cation exchange capacity

13.2. Determination of the potential cation exchange capacity	
Chapter 14. DETERMINATION OF MICROBIAL ACTIVITY	
14.1. Determination of microbial biomass	
14.2. Determination of nitrogen mineralization and nitrification	
Chapter 15. INSPECTION OF INORGANIC CONTAMINATION	
15.1. Determination of total trace element content	
15.2. Determination of heavy metals	
Chapter 16. INSPECTION OF ORGANIC CONTAMINATION	
16.1. Determination of mineral oil content	
16.2. Determination of polycyclic aromatic hydrocarbons	
Chapter 17. INSPECTION OF THE EFFECTS OF POLLUTANTS ON INHIBITION OF ROOT GROWTH	
17.1. Determination of the effects of pollutants on inhibition of root growth	
17.2. Determination of the effects of pollutants on the emergence and growth of higher plants	
Chapter 18. INSPECTION OF THE EFFECTS OF POLLUTANTS ON DEVELOPING OF SOIL ORGANISMS	
18.1. Determination of the effects of pollutants on acute lethal toxicity of earthworms	
18.2. Determination of the effects of pollutants on reproduction of earthworms	
18.3. Determination of the effects of pollutants on acute lethal toxicity of earthworms in field situations	
18.4. Determination of the effects of pollutants on inhibition of reproduction of <i>Collembolas</i>	
Chapter 19. INSPECTION OF BIODEGRADABILITY OF CHEMICALS	
19.1. General requirements to choice of methods for organic chemicals' min- eralization evaluation	
19.2. Determination of the mineralization of organic chemicals under aerobic conditions	
Chapter 20. INSPECTION OF NATURAL SOIL RESOURCES	
20.1. Methods of sulfur dioxide fall-out determination	
20.2. Methods of radioactivity determination	
ANNEX 1	
List of International standards on soil quality inspection	
ANNEX 2	
List of state standards on soil quality inspection	
ANNEX 3	
List of American's standards on soil quality inspection	
ANNEX 4	
Guidance on manual field soil description	
ANNEX 5	
Methods of analysis of sewage's for agriculture use	
ANNEX 6	
Guidance for waste waters and slag sampling	
ANNEX 7	
Guidance for groundwater sampling	
ANNEX 8	
Methods of sludge and sediment samples' preservation and storage	
BIBLIOGRAPHY
